

IBDP RESULTS

The IBDP results have been declared worldwide and we are proud to say that the NIS batch of 2020-2022 has achieved a wonderful result considering that their two year IBDP journey was almost entirely online!

Our students have performed exceptionally well in all requirements of the two-year curriculum. The following is a summary of the average grade of NIS students in comparison with world average grades. **The highest grade achievable is a 7.**

In English, NIS students have achieved an average grade of **5.43, against a world average of 5.02.** For French, students have scored a huge difference of average grade of **5.57**, as compared to the world average of **5.12.** Spanish students have achieved a similar massive difference of average grade **5.67** against a world average of **5.02.** Hindi averaged at a high of **6.00** versus a world average of **5.80.**

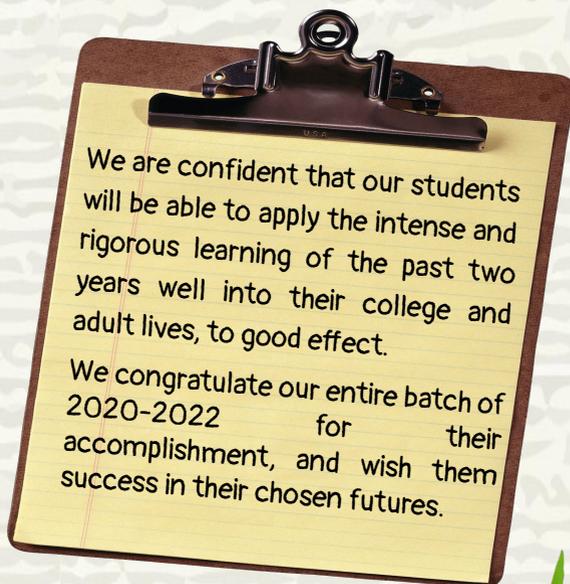

Economics students have achieved a high score of **5.67** against a world average grade of **5.39**, whereas Business Management students have dazzled at **7.00**, much higher than the world average of **5.10.** ESS (Environmental Systems and Societies) students scored a high average of **5.29** as against a world average of **4.46.** Global Politics, a rarely attempted subject, has scored a stellar average grade of **5.50**, against world average of **5.08.**

Coming to the sciences, for **Biology**, the NIS student average grade is **5.00**, much higher than the world average of **4.56.** **Chemistry** is considerably higher than the world average, NIS - **5.67** as against world average grade **4.98.** **Physics** students scored a superb average of **5.50** with the world average grade being **5.09.**

Mathematics AA students have achieved a whopping average grade of **6.00** as opposed to a world average of **4.99.** **Mathematics AI**, too, scored a wonderful average grade of **5.33** against a world average of **4.39.**

Visual Arts, a very difficult subject to achieve high grades at, has scored a much higher average **5.00** against a world average of **4.44.**

We are immensely proud that this grade reflects our students' entire two-year journey, and the hard work they have put in over the DP years, compounded by the difficulties of the online platform of learning. The batch of 2020-2022 students began studying in the physical campus, only by mid January 2022. Despite their mainly online learning, their final assessments took place in the physical space, in an environment the students had had very little time to readjust to. Nevertheless, their results speak about their resilience.

University Admission list

After another successful batch of the IB Diploma Programme and our first A Level batch, we are proud to announce that our students have been accepted to these universities.
